**Location**

Pune, Maharashtra

**Industry**Industrial Machinery
Manufacturing**Applications Replaced**Tally, Microsoft Office,
Excel**Zoho One Suite:**Zoho CRM, Zoho People, Zoho Payroll, Zoho Expense, Zoho Desk, Zoho Forms,
Zoho Books, Zoho Inventory

COMPANY OVERVIEW

A leading Industrial Machinery Manufacturer in Pune suffered from severe operational fragmentation, relying on disconnected tools like Tally and Excel for critical functions (finance, sales, HR). This resulted in scattered data, extensive manual entry, and a lack of real-time visibility, severely hindering cross-department collaboration and slowing down daily business operations.

To centralize data and standardize processes, the organization chose the Zoho One Suite as its unified digital platform. AGSuite successfully implemented Zoho One, enabling the manufacturing firm to eliminate data silos, automate workflows, and achieve the enhanced operational visibility necessary for streamlining their entire business and improving workforce productivity.

CHALLENGES WITH LEGACY SYSTEMS

Data Fragmentation

- Information was stored across multiple spreadsheets and local systems, affecting transparency, real-time access, and data consistency.

Manual & Error-Prone Workflows

- Finance, sales, HR, and customer interactions relied on manual updates, leading to higher risk of errors and delays.

Lack of Integrated Business Processes

- No centralized system for inventory tracking, approvals, payroll, and expense claims, resulting in workflow inefficiencies.

CHALLENGES WITH LEGACY SYSTEMS

Limited Visibility for Leadership

- Absence of unified reporting and automated dashboards restricted decision-making and performance analysis.

Scalability Limitations

- Legacy tools could not support growing business complexity and expanding operational requirements.

SOLUTION: ZOHU ONE SUITE OF APPLICATIONS

- **Zoho CRM** for structured lead, customer, and dealer management — giving clear visibility into sales activities.
- **Zoho People & Zoho Payroll** to automate attendance, leave, employee records, and payroll processes — ensuring compliance and payroll accuracy.
- **Zoho Expense** to simplify employee reimbursement, approvals, and tracking of business expenses.
- **Zoho Desk** to enhance after-sales support with centralized ticketing, SLA tracking, and improved customer experience.
- **Zoho Forms** for capturing inquiries, internal requests, and operational data digitally.
- **Zoho Books & Zoho Inventory** to manage complete accounting, taxation (GST), procurement, stock control, and multi-warehouse operations — all in real-time.
- **Accounting Data Migration** from Tally to Zoho Books ensuring continuity, financial history availability, and accurate reporting.

These applications were configured to automate core processes and ensure data flows smoothly between teams — from sales to finance to support.

BENEFITS AFTER ZOHU IMPLEMENTATION

Unified Digital Platform

- All business departments now operate on a single integrated system, eliminating manual silos and duplication of work.

Greater Financial Accuracy

- Automated books, streamlined procurement and billing, and historical data migration improved compliance and auditing readiness.

Better Inventory & Production Coordination

- Real-time stock visibility and approvals enhanced planning and reduced operational delays.

BENEFITS AFTER ZOHO IMPLEMENTATION

Boost in Workforce Productivity

- HR and payroll automation reduced manual workload, enabling teams to focus on operations and growth.

Enhanced Customer Experience

- Unified customer data and automated ticketing ensured quicker support and stronger customer relationships.

Scalable for Future Growth

- Zoho One provides the flexibility and technology stack needed to expand business functions without IT complexity.

AGSUITE SUPPORT

From solution design to deployment, training, and post-Go-Live support, AGSuite ensured a smooth transition with high user adoption — enabling the manufacturing firm to accelerate its digital transformation seamlessly.
