

ZOHO FOR PROFESSIONAL SERVICES & INDUSTRIAL ENGINEERING INDUSTRY

CASE STUDY

Pune, India

APPLICATION REPLACED

Tally, Microsoft Office, Excel & Spreadsheet

Professional Services & Industrial Engineering

PRODUCTS

Zoho Books Professional

COMPANY OVERVIEW

A leading organization in the professional services and industrial automation engineering sector, delivering integrated automation, engineering design, and turnkey project execution across global markets including the USA, UK, Canada, the Middle East, and India. With strong expertise in industrial automation and multidisciplinary engineering, the organization supports complex projects from pre-FEED to commissioning and has expanded into renewable energy with solar installation and O&M services.

With growing project volumes and international operations, the organization required a modern accounting platform to replace Tally and spreadsheets, enabling improved financial control, compliance, and scalability.

CHALLENGES WITH EXISTING SYSTEMS

- Accounting and financial records were managed using Tally and manual spreadsheets, limiting real-time visibility.
- Project-based billing and expense tracking required significant manual effort.
- Leadership lacked consolidated financial insights across multiple projects and geographies.
- Existing systems were not scalable enough to support expanding global operations and compliance requirements.

SOLUTION: ZOHO BOOKS PREMIUM WITH DATA MIGRATION

AGSuite implemented Zoho Books Premium to digitize and streamline financial operations:

- Migration of historical accounting data from Tally to Zoho Books ensured continuity of financial records, including ledgers, customers, vendors, and opening balances.
- Zoho Books Premium enabled automated invoicing, project expense tracking, GST compliance, vendor management, and bank reconciliation.
- Centralized financial data improved accuracy and simplified reporting for project-based services.

This implementation provided a robust and scalable accounting foundation aligned with the organization's engineering and professional services model.

BENEFITS AFTER ZOHO IMPLEMENTATION

Centralized Financial Control

- All accounting data is now managed on a single cloud-based platform, improving accuracy and transparency.

Improved Operational Efficiency

- Automation reduced manual accounting efforts, allowing teams to focus on project execution and analysis.

Enhanced Financial Visibility

- Real-time reports and dashboards support informed decision-making across projects and regions.

Scalable & Compliance-Ready System

- Zoho Books Premium supports multi-project accounting, regulatory compliance, and future business expansion.
